ISSN: 1063-8016; EISSN: 1533-8010
Established 1990; Published Quarterly

Editor(s)-in-Chief: Keng Siau (Missouri University of Science and Technology, USA)

The Journal of Database Management (JDM) publishes original research on all aspects of database management, systems analysis and design, and software engineering. The primary mission of JDM is to be instrumental in the improvement and development of theory and practice related to information technology and management of information resources. The journal is targeted at both academic researchers and practicing IT professionals.

Topics Covered:

- Agile systems development
- Artificial intelligence
- Augmented and virtual reality
- Bio-informatics
- Business Analytics
- Business Intelligence
- Cloud computing
- Cognitive modeling
- Conceptual modeling
- Cybersecurity
- Data Science
- Data quality
- Data warehousing and data mining
- Database management and administration
- Database models and query languages
- Database security and integrity
- Design science
- E-business, m-commerce, and social-commerce models and architectures
- Empirical software engineering
- Enterprise systems and supply chain integration
- Financial technology
- Geographical information systems
- Human-computer interaction and user experience
- Heterogeneous and distributed database
- Information and knowledge modeling
- Internet of Things
- Intelligent agents and agent-based applications
- Knowledge engineering and management
- Machine learning
- Method engineering and metamodeling
- Object-oriented methods and methodologies
- Requirements engineering
- Service-oriented architecture/service-oriented computing
- Semantic Web and ontology
- Smart technology
- Software engineering
- System analysis and design
- Unified modeling language and unified process
- Web database and Web-based information systems
- Web design methods and methodologies
