Cybersecurity Measures for Logistics Industry Framework

Part of the Advances in Logistics, Operations, and Management Science Book Series

Noor Zaman Jhanjhi (Taylor's University, Malaysia) and Imdad Ali Shah (Taylor's University, Malaysia)

Description:

Global supply chains are becoming more customer-centric and sustainable thanks to next-generation logistics management technologies. Automating logistics procedures greatly increases the productivity and efficiency of the workflow. There is a need, however, to create flexible and dynamic

relationships among numerous stakeholders and the transparency and traceability of the supply chain. The digitalization of the supply chain process has improved these relationships and transparency; however, it has also created opportunities for cybercriminals to attack the logistics industry.

Cybersecurity Measures for Logistics Industry Framework discusses the environment of the logistics industry in the context of new technologies and cybersecurity measures. Covering topics such as AI applications, inventory management, and sustainable computing, this premier reference source is an excellent resource for business leaders, IT managers, security experts, students and educators of higher education, librarians, researchers, and academicians.
