Current Trends in Cybersecurity and Educational Technology

Part of the Advances in Educational Technologies and Instructional Design Book Series

Remberto Jimenez (New Jersey City University, USA) and Veronica E. O'Neill (New Jersey City University, USA)

Description:

There has been an increased use of technology in educational settings since the start of the COVID-19 pandemic. Despite the benefits of including such technologies to support education, there is still the need for vigilance to counter the inherent risk that comes with the use of such technologies as the protection of students and their information is paramount to the effective deployment of any technology in education.

Current Trends in Cybersecurity and Educational Technology explores the full spectrum of cybersecurity and educational technology today and brings awareness to the recent developments and use cases for emergent educational technology. Covering key topics such as artificial intelligence, gamification, robotics, and online learning, this premier reference source is ideal for computer scientists, industry professionals, policymakers, administrators, researchers, academicians, scholars, practitioners, instructors, and students.

Topics Covered:

Artificial Intelligence Augmented Reality Blockchain Cybersecurity Gamification Mixed Realities
Online Assessment Tools
Online Learning
Robotics
Technology

Subject: Education Classification: Edited Reference

Readership Level: Advanced-Academic Level

(Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
