

Global Challenges in Public Finance and International Relations

Part of the Advances in Finance, Accounting, and Economics Book Series

Deniz Şahin Duran (Gaziosmanapaşa University, Turkey), Yusuf Temür (Gaziosmanapaşa University, Turkey) and Doğan Bozdoğan (Gaziosmanapaşa University, Turkey)

Description:

Although the concept of international public goods has been established, new international public needs arise by the day. For example, while there are many taxation problems and debates that have not yet been resolved internationally, many new tax-related problems like international transfer pricing, taxation of virtual profits, and taxation of electronic commerce are being added. These issues require studies that will discuss a new agenda and propose solutions for these dilemmas and problems.

Global Challenges in Public Finance and International Relations provides an innovative and systematic examination of the present international financial events and institutions, international financial relations, and fiscal difficulties and dilemmas in order to discuss solutions for potential problems in the postmodern world. Highlighting topics such as international aid, public debt, and corporate governance, this publication is designed for executives, academicians, researchers, and students of public finance.
