

# Improving Library Systems with AI: Applications, Approaches, and Bibliometric Insights

Part of the Advances in Library and Information Science Book Series

KR Senthilkumar (Nehru Institute of Engineering and Technology, India)

## Description:

As libraries transition into the digital age, they encounter a pressing challenge: outdated information systems hinder their ability to meet the diverse needs of patrons. Traditional library management systems struggle to cope with the demands of modern users, resulting in inefficient resource allocation, limited accessibility, and disjointed user experiences. This disconnect between antiquated systems and evolving user expectations poses a significant barrier to libraries striving to remain relevant in an increasingly digital world.

**Improving Library Systems with AI: Applications, Approaches, and Bibliometric Insights** presents a comprehensive solution to this pressing problem. By integrating modern digital tools and technologies, libraries can revolutionize their information systems, enhancing accessibility, efficiency, and user satisfaction. This book offers practical insights and strategies for modernizing library services and operations, from digitizing physical resources to implementing advanced search algorithms and data analytics. Librarians, administrators, and technology providers will find invaluable guidance on navigating the complexities of digital transformation and maximizing the impact of their efforts.

Through case studies, best practices, and in-depth analysis, this book equips stakeholders with the knowledge and tools to navigate the digital landscape and future-proof their libraries. The principles outlined in this book empower libraries to overcome the challenges of outdated information systems and emerge as vibrant, dynamic hubs of knowledge and innovation.

**ISBN:** 9798369355930

**Pages:** 340

**Copyright:** 2024

**Release Date:** April, 2024

**Hardcover:** \$245.00

**E-Book:** \$245.00

**Hardcover +  
E-Book:** \$295.00

## Topics Covered:

- Academic Libraries
- Case Studies
- Collaborative Spaces
- Content Accessibility
- Cultural Heritage
- Data Analytics
- Digital Divide
- Digital Libraries
- Digital Preservation
- Digital Transformation
- E-books
- Educational Technology
- RFID Technology
- User Insights
- Virtual Reality Applications

**Subject:** Library & Information Science

**Classification:** Edited Reference

**Readership Level:** Advanced-Academic Level  
(Research Recommended)

**Research Suitable for:** Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
