

# Modeling Methods for Business Information Systems Analysis and Design

Part of the Advances in Business Information Systems and Analytics Book Series

Selin Erben (Beykent University, Turkey)

## Description:

The field of information systems analysis and design includes numerous evolving modelling methods and notations. Even with some attempts to standardize, new modelling methods are constantly being introduced that significantly impact the way information systems are analyzed and designed in practice.

**Modeling Methods for Business Information Systems Analysis and Design** is a collection of innovative research on the methods and applications of knowledge systems and their applications within organizational settings. While highlighting topics including finance, operational planning, and enterprise models, this book is ideally designed for academicians, professionals, and organizational researchers seeking current research on organizational design.
