

Strategies and Tactics for Multidisciplinary Writing

Part of the Advances in Linguistics and Communication Studies Book Series

Kemi Elufiede (Carnegie Writers, Inc., USA) and Carissa Barker Stucky (Carnegie Writers, Inc., USA)

Description:

Across a wide range of fields of study and academic interests, there is often a common denominator in the need for successful, concise, and well-researched communications in the form of writing. Whether it be accessing credible research, pre-writing practices, or taking writing to the next level from good to excellent, there is a constant need for teaching writing skills and methods effectively as well as utilizing what has been learned within real-life applications to create quality written content. With composers of the written word ranging from students to researchers to business owners or more, multidisciplinary writing encompasses a range of research devoted to enhancing writing skills and providing an understanding of the writing process across diverse fields of interest.

Strategies and Tactics for Multidisciplinary Writing provides writers in the professional and academic sphere resources for enhancing their writing skills through a clear understanding of the writing process. The chapters focus on the multiple stages of writing including planning, researching, drafting, revising, and more. While highlighting specific topics such as writing in virtual environments, topic research, writing for the internet, and pre-writing practices, this book is ideally intended for writers in the professional and academic spheres as well as practitioners, stakeholders, researchers, academicians, and students interested in multidisciplinary writing.
