

Trends in Music Information Seeking, Behavior, and Retrieval for Creativity

Part of the Advances in Multimedia and Interactive Technologies Book Series

Petros Kostagiolas (Ionian University, Greece), Konstantina Martzoukou (Robert Gordon University, UK) and Charilaos Lavranos (Ionian University, Greece)

Description:

In the literature of information science, a number of studies have been carried out attempting to model cognitive, affective, behavioral, and contextual factors associated with human information seeking and retrieval. On the other hand, only a few studies have addressed the exploration of creative thinking in music, focusing on understanding and describing individuals' information seeking behavior during the creative process.

Trends in Music Information Seeking, Behavior, and Retrieval for Creativity

connects theoretical concepts in information seeking and behavior to the music creative process. This publication presents new research, case studies, surveys, and theories related to various aspects of information retrieval and the information seeking behavior of diverse scholarly and professional music communities.

Readers:

Music professionals, theorists, researchers, and students will find this publication an essential resource for their professional and research needs.
