

# Global Adaptations of Community College Infrastructure

Part of the Advances in Higher Education and Professional Development Book Series

Uttam Gaulee (Morgan State University, USA)

## Description:

Community colleges in America have evolved a great deal from the establishment of the first community college in Chicago 117 years ago. The idea of American community colleges serves as a catalyst for connective solutions between industry, college, and the community on a global level.

**Global Adaptations of Community College Infrastructure** provides emerging research on various contextual adaptations of the idea of the American community college as a connective solution to engaging community and industry. This research will help any nation or state forge policies on adapting the concept toward democratization of economic opportunities for all individuals as opposed to the current elitist system of higher education. Featuring coverage on a broad range of topics such as diploma pathway programs and the development of education institutions in various countries, this book is ideally designed for academicians, economic and educational policymakers, higher education professionals, and individuals engaged in expansion and democratization of post-secondary education worldwide.

**ISBN:** 9781522558613
