

Handbook of Research on Geographic Information Systems Applications and Advancements

Part of the Advances in Geospatial Technologies Book Series

Sami Faiz (LTSIRS Laboratory, University of Tunis El Manar, Tunisia) and Khaoula Mahmoudi (LTSIRS Laboratory, University of Tunis El Manar, Tunisia)

Description:

The proper management of geographic data can provide assistance to a number of different sectors within society. As such, it is imperative to continue advancing research for spatial data analysis.

The **Handbook of Research on Geographic Information Systems Applications and Advancements** presents a thorough overview of the latest developments in effective management techniques for collecting, processing, analyzing, and utilizing geographical data and information. Highlights theoretical frameworks and relevant applications.

Readers:

This book is an ideal reference source for researchers, academics, professionals, and students actively involved in the field of geographic information systems.

ISBN: 9781522509370

Release Date: November, 2016

Copyright: 2017

Pages: 567

Topics Covered:

- Data Mining
- Disaster Management
- Image Processing Techniques
- Land Degradation Mapping
- Land Use
- Remote Sensing
- Smart Cities
- Urban Planning

Table of Contents

Chapter 1: Spatial and Spatiotemporal Data Types as a Foundation for Representing Space-Time in GIS

Markus Schneider, University of Florida, USA

Chapter 2: Nature of Geospatial Knowledge Bases

Robert Laurini, INSA de Lyon, France

Chapter 3: GIS Use for Mapping Land Degradation: A Review of Research Carried Out in Tunisia

Mohamed Rached Boussema, University of Tunis El Manar, Tunisia

Chapter 4: Urban Development Modelling: A Survey

Asma Gharbi, University of Paris8, France

Cyril De Runz, University of Reims Champagne-Ardenne, France

Herman Akdag, University of Paris8, France

Chapter 5: 3D Insar Phase Unwrapping within the Compressive Sensing Framework

Wajih Ben Abdallah, Higher School of Communications of Tunis, Tunisia

Riadh Abdelfattah, Higher School of Communications of Tunis, Tunisia

Chapter 6: Geographic Information Systems and Its Applications in Marketing Literature

Dursun Yener, Istanbul Medeniyet University, Turkey

Chapter 7: Re-Territorializing Governance and the State – Exploring Advancements in Property: Taxation Systems Databases in Karnataka, India

Shelfali Virkar, University of Oxford, UK

Chapter 8: A Data Mining Framework for Forest Dire Mapping

Ahmed Toujani, LTSIRS Laboratory, National Engineering School of Tunis, Tunisia

Hammadi Achour, LRSP Laboratory, Silvo-Pastoral Institute of Tabarka, University of Jendouba, Tunisia

Chapter 9: Enhanced F-Perceptory Approach for Dealing with Geographic Data Imprecision from the Conceptual Modeling to the Fuzzy Geographical Database Building

Besma Khalfi, LIASD, Université Paris 8, France

Cyril De Runz, University of Reims, France

Herman Akdag, LIASD, France

Chapter 10: Microblogs Information Retrieval for Disaster Management: Identification of Prominent Microblog Users in the Context of Disasters

Imen Bizid, L3i, University of La Rochelle, France

Nibal Nayef, L3i, France

Sami Faiz, LTSIRS, Tunisia

Patrice Boursier, Int. University of Malaya-Wales, Malaysia

Chapter 11: Inter and Intra Cities Smartness: A Survey on Location Problems and GIS Tools

Ghada A. El Khayat, Alexandria University, Egypt

Nada Ahmad Fashal, Alexandria University, Egypt

Chapter 12: Knowledge Extraction from Geographical Databases for Land Use Data Production

Hana Alouaoui, ENIT- University Tunis El Manar, Tunisia

Sami Yassine Turki, ENIT- University Tunis El Manar, Tunisia

Sami Faiz, ENIT University Tunis El Manar, Tunisia

Chapter 13: Geographic Knowledge Discovery in Multiple Spatial Databases

Tahar Mehenni, University Mohamed Booudiaf of M'sila, Algeria

Chapter 14: Semantically Enriching Geodata

Khaoula Mahmoudi, Enit, Tunisia

Chapter 15: Prediction Changes for Nonstationary Multi-Temporal Satellite Images using HMM: Prediction Changes for MTSI using HMM

Ali Ben Abbes, ENSI, Tunisia

Imed Raidh Farah, ISAMM, Tunisia

Chapter 16: A Feature Selection-Based Method for an Ontological Enrichment Process in Geographic Knowledge Modelling

Mohamed Farah, ISAMM, Tunisia

Hafedh Nefzi, ISAMM, Tunisia

Imed Riadh Farah, ISAMM, Tunisia

Chapter 17: Species Distribution Models (SDM)- A Strategic Tool for Predicting Suitable Habitats for Conserving the Target Species: GIS and Special Distribution Modelling (SDM)

Balaguru Balakrishnan, Jamal Mohamed College, India

Nagamurugan Nandakumar, Government Arts College, India

Soosairaj Sebastin, St. Joseph's College, India

Khaleel Ahmed Abdul Kareem, Jamal Mohamed College, India

Chapter 18: Urban Master Data Management: Case of the YUSIIP Platform

Adolphe Ayissi Eteme, IUT University of Ngaoundere, Cameroon

Justin Moskolai Ngossaha, UFD-MIAP, University of Ngaoundere, Cameroon

Chapter 19: Geospatial and Spatio-Temporal Analysis in Health Research: GIS in Health

Dimitra I Sifaki-Pistolla, University of Crete, Greece

Georgia D Pistolla, University of Crete, Greece

Vasiliki-Eirini Chatzea, University of Crete, Greece

Nikolaos Tzanakis, University of Crete, Greece

Chapter 20: Towards the Integration of Trajectory Information Sources for Semantic Conflicts Detection Purpose: A Trajectory Ontology Based Approach

Marwa Manaa, ISG, Tunisia

Akaichi Jalel, ISG, Tunisia

Chapter 21: Mining Spatial Patterns of Distribution of Uranium in Surface and Ground Waters in Ukraine

Michael Govorov, Vancouver Island University, Canada

Viktor Putrenko, National Technical University of Ukraine "Kyiv Polytechnic Institute," Ukraine

Gennady Gienko, University of Alaska Anchorage, USA

Chapter 22: A Paradigm of Improving Land Information Management

Moha El-Ayachi, Geomatic Sciences and Surveying Engineering, Morocco

Sami Faiz is a PhD in Computer Science from Orsay University (Paris 11). He is actually Full Professor in Computer Science at the Higher Institute of Multimedia Arts of Manouba and member of the Laboratory of Remote Sensing and Spatial Information Systems. He published more than 150 papers in specialized conferences and journals. He's also the author of three books in the framework of GIS. Prof. Faiz is a scientific and organizing member of various international conferences. He's also the founder of many national and international projects in Geomatics.

Khaoula Mahmoudi is a holder of a PhD in Information and Communications Technology (ICT) at the Higher School of Communication of Tunis (SUP'COM) further to obtaining a master degree in business data processing at the Higher Institute of Management (ISG-Tunis). She taught in several institutes since 2001 and currently she is an assistant-Professor in Computer Science at FSEGN - University of Carthage. Khaoula Mahmoudi is a member of Laboratoire de Télédétection et Systèmes d'Informations à Références Spatiales (LTSIRS) – ENIT. She is concerned with research activities in the area of the enrichment of geographic databases. She presented and published numerous articles in different conferences books and Journals.
