

Practices, Challenges, and Prospects of Digital Ethnography as a Multidisciplinary Method

Jahid Siraz Chowdhury (University of Malaysia, Malaysia), Haris Abd Wahab (University of Malaya, Malaysia), Rashid Mohd Saad (University of Malaya, Malaysia), Parimal Kumar Roy (University of Malaya, Malaysia) and Joseph Wronka (Springfield Colleges, USA)

Description:

Ethnography in the digital age presents new methods for research. It encourages scientists to think about how we live and study in a digital, material, and sensory world. Digital ethnography considers the impact of digital media on the methods and processes by which we perform ethnography and how the digital, methodological, practical, and theoretical aspects of ethnographic research are becoming increasingly interwoven. This planet does not exist in a static state; as technology grows and shifts, we must learn how to appropriately analyze these changes.

Practices, Challenges, and Prospects of Digital Ethnography as a Multidisciplinary Method examines the pervasiveness of digital media in digital ethnography's setting and practice. It investigates how digital settings, techniques, and procedures are reshaping ethnographic practice and explores the ethnographic-theoretical interactions through which "old" opinions are influenced by digital ethnography practice, going beyond merely transferring conventional concepts and techniques into digital research settings. Covering topics such as data triangulation, indigenous living systems, and digital technology, this premier reference source is an essential resource for libraries, students, teachers, sociologists, anthropologists, social workers, historians, political scientists, geographers, public health officials, archivists, government officials, researchers, and academicians.

ISBN: 9781668441909

Pages: 335

Copyright: 2022

Release Date: May, 2022

Hardcover: \$215.00

Softcover: \$165.00

E-Book: \$215.00

Hardcover + E-Book: \$260.00

Topics Covered:

Academic Performance

Belt and Road Initiative (BRI)

Cross-Cultural Digital Ethnography

Data Triangulation

Data Trustworthiness

Digital Autoethnography

Digital Ethnography

Digital Technology

Ethnographic Research

Indigenous Living Systems

Online Services

Patient Autonomy-Based Ethics of Informed Consent

Subject: Social Sciences & Humanities

Classification: Edited Reference

Readership Level: Advanced-Academic Level
(Research Recommended)

Research Suitable for: Advanced Undergraduate Students; Graduate Students; Researchers; Academicians; Professionals; Practitioners
