Optimizing Contemporary Application and Processes in Open Source Software
Part of the Advances in Systems Analysis, Software Engineering, and High Performance Computing Book Series

Mehdi Khosrow-Pour (Information Resources Management Association, USA)

Description:

As is true of most technological fields, the software industry is constantly advancing and becoming more accessible to a wider range of people. The advancement and accessibility of these systems creates a need for understanding and research into their development.

Optimizing Contemporary Application and Processes in Open Source Software is a critical scholarly resource that examines the prevalence of open source software systems as well as the advancement and development of these systems. Featuring coverage on a wide range of topics such as machine learning, empirical software engineering and management, and open source, this book is geared toward academicians, practitioners, and researchers seeking current and relevant research on the advancement and prevalence of open source software systems.

ISBN: 9781522553144   **Release Date:** February, 2018   **Copyright:** 2018   **Pages:** 325

Topics Covered:

- E-Learning Software
- Empirical Software Engineering and Management
- Fault Prediction
- Machine Learning
- Open Source
- Software Cybernetics
- Source Code Analysis

Hardcover: $215.00
E-Book: $215.00
Hardcover + E-Book: $260.00
