Enterprise Resource Planning Models for the Education Sector: Applications and Methodologies

Kanubhai K. Patel (Ahmedabad University, India) and
Sanjaykumar Vij (SVIT, India)

Even as enterprise resource planning (ERP) continues to play a strategic role in an education sector, educational institutions and universities are facing many challenges in creating strong ERP applications and methods to achieve the expectations of academia.

Enterprise Resource Planning Models for the Education Sector: Applications and Methodologies is a comprehensive collection of research which highlights the increasing demand for insight into the challenges faced by educational institutions on the design and development of enterprise resource planning applications. This book is composed of content from management and engineering students, professionals and researchers in the education fields.

Topics Covered:

- Course and Curriculum Development
- Customer Relationship Management for Academia
- Educational Information System
- E-Learning Design
- ERP Adoption and Implementation
- Industry-Institute Interaction Management
- Knowledge Management
- Learning Management
- Process Simulation
