

Revolutionizing Digital Healthcare Through Blockchain Technology Applications

Part of the Advances in Healthcare Information Systems and Administration Book Series

Yuk Ming Tang (The Hong Kong Polytechnic University, Hong Kong),
Ka Yin Chau (City University of Macau, Hong Kong),
George To Sum Ho (The Hang Seng University of Hong Kong, Hong Kong) and Yan Wan (City University of Macau, China)

Description:

Despite blockchain being an emerging technology that is mainly applied in the financial and logistics domain areas, it has great potential to be applied in other industries to generate a wider impact. Due to the need for social distancing globally, blockchain has great opportunities to be adopted in digital health including health insurance, pharmaceutical supply chain, remote diagnosis, and more.

Revolutionizing Digital Healthcare Through Blockchain Technology Applications explores the current applications and future opportunities of blockchain technology in digital health and provides a reference for the development of blockchain in digital health for the future. Covering key topics such as privacy, blockchain economy, and cryptocurrency, this reference work is ideal for computer scientists, healthcare professionals, policymakers, researchers, scholars, academicians, practitioners, instructors, and students.
