

Advanced Agro-Engineering Technologies for Rural Business Development

Part of the Advances in Environmental Engineering and Green Technologies Book Series

Valeriy Kharchenko (Federal Scientific Agroengineering Center VIM, Russia) and Pandian Vasant (Universiti Teknologi PETRONAS, Malaysia)

Description:

Developing countries need access to the technological advancements of the modern world in order to apply these advancements to their small-scale operations. Applying newly discovered information concerning efficient energy to remote corners of the world will ensure small-scale businesses can conduct successful production and sale of agricultural products.

Advanced Agro-Engineering Technologies for Rural Business Development is an essential reference source that examines technological methods and technical means that ensure the organization of production of various products and adapts them for application in small-scale production. Additionally, it seeks to organize an efficient production process in the face of energy resource scarcity and emphasizes the need to rationally use them. This book is ideally designed for students, managers, experts, and small businesses.

ISBN: 9781522575733

Release Date: March, 2019

Copyright: 2019

Pages: 300

Topics Covered:

- Cultivation Technology
- Disinfectant System
- Grain Drying
- Livestock Production
- Magnetic Field Treatment
- Renewable Energy
- Robotic Applications
- Seed Transportation
- Thermal Treatment
- Water Treatment

Hardcover: \$195.00

E-Book: \$195.00

Hardcover + E-Book: \$235.00
