

Scholarly Content and Its Evolution by Scientometric Indicators: Emerging Research and Opportunities

Part of the Advances in Knowledge Acquisition, Transfer, and Management Book Series

Zahid Ashraf Wani (University of Kashmir, India) and Tazeem Zainab (University of Kashmir, India)

Description:

The twenty-first century brought unique developments in science and technology. Research surged as individuals sought to uncover hidden knowledge, leading to the introduction of research evaluation to ensure precise and fair research output and dissemination.

Scholarly Content and Its Evolution by Scientometric Indicators: Emerging Research and Opportunities is a pivotal reference source that provides vital research on the application of research evaluation, specifically through the lens of scientometrics. While highlighting topics such as bibliometrics and the h-index, this publication explores a full range of research indicators available for the evaluation and assessment of scientific literature. This book is ideally designed for scholars, professors, academicians, researchers, and graduate-level students seeking current research on metric science.
