

# New Threats and Countermeasures in Digital Crime and Cyber Terrorism

Part of the Advances in Digital Crime, Forensics, and Cyber Terrorism (ADCFCT) Book Series

Maurice Dawson (University of Missouri–St. Louis, USA) and Marwan Omar (Nawroz University, Iraq)

## Description:

Technological advances, although beneficial and progressive, can lead to vulnerabilities in system networks and security. While researchers attempt to find solutions, negative uses of technology continue to create new security threats to users.

**New Threats and Countermeasures in Digital Crime and Cyber Terrorism** brings together research-based chapters and case studies on security techniques and current methods being used to identify and overcome technological vulnerabilities with an emphasis on security issues in mobile computing and online activities.

## Readers:

This book is an essential reference source for researchers, university academics, computing professionals, and upper-level students interested in the techniques, laws, and training initiatives currently being implemented and adapted for secure computing.
