## Aviation Technology, Engineering and Management (IJATEM)

ISSN: 2155-6962; EISSN: 2155-6970  
Established 2011; Published Semi-Annually

### Editor(s)-in-Chief:

Kevin M. Smith (U. S. Navy (Retired); United Airlines (Retired), USA)

The **International Journal of Aviation Technology, Engineering and Management (IJATEM)** analyzes and discusses current developments and solutions in information technology pertaining to aeronautics technical knowledge, administration, and engineering. IJATEM is seeking emerging, cutting-edge technologies, advanced engineering methods, human performance optimization strategies, machine knowledge-based components, and flight safety management programs, such that continuous improvements in Air Operations can be realized. Aviation professionals are therefore encouraged to submit articles for possible publication in this important journal.

### Individual Price:

E-Journal: US \$175.00  
Print: US \$260.00  
Print + E-Journal: US \$345.00

### Institution Price:

Print: US \$725.00  
Online Access: US \$725.00  
Print + Online Access: US \$1,040.00  
Institution Online Access Backfile: US TBD  
*Prices are subject to change without notification.*

### Topics Covered:

- Aeronautical billing computerized systems
- Aeronautical invoicing system
- Air traffic control information technology
- Aircraft design and computers
- Airline reservations information systems
- Airport operational database (AODB)
- Apron handling technology
- Artificial intelligence uses in profiling
- Aviation and computer simulation
- Aviation data communications
- Biosecurity in the aviation industry
- Business intelligence systems in aviation
- Computerized ledger systems in aviation
- Computerized security checking
- Decision sciences and management information systems in aviation
- Economics of computerization of aviation
- E-service and Web intelligence
- E-ticketing information technology
- Evolutionary role of computation in aviation
- Flight information display systems (FIDS)
- Fuzzy computation uses in aviation
- Incident management information systems
- Intellectual property (IP)
- Knowledge management in aviation
- Network planning, slot allocation, and scheduling computer systems
- Network simulators
- Object-oriented technology in aviation applications
- Project management (PM)
- Property management and interactive voice response (IVR)
- Radio frequency identification (RFID) applications and security in aviation
- Resource planning and management systems

### SUBMISSION INFORMATION

Prospective authors should note that only original and previously unpublished articles will be considered. Interested authors must consult the journal's guidelines for manuscript submissions at [www.igi-global.com/publish/resources](http://www.igi-global.com/publish/resources) prior to submission. All article submissions will be forwarded to the Editorial Review Board for double-blind, peer review.

All submissions and inquiries should be directed to the attention of:  
Captain Kevin M. Smith, [captainkmsmith@gmail.com](mailto:captainkmsmith@gmail.com)
