

## Dependable and Trustworthy Information Systems (IJDTIS)

ISSN: 1947-9050; EISSN: 1947-9069

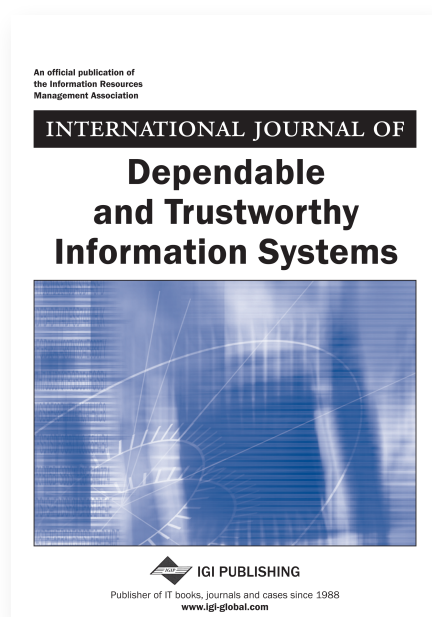

Established 2010; Published Quarterly

**Editor(s)-in-Chief:** A.F. Salam (The University of North Carolina at Greensboro, USA) and Sandra A. Vannoy (Appalachian State University, USA)

IJDTIS publishes high quality research on the broad and comprehensive field of dependable and trustworthy computing and information systems. This journal contributes and disseminates knowledge related to the varied technical, social, behavioral, cultural, managerial, organizational, and national aspects underpinning system engineering.

### Topics Covered:

- Business value of trustworthy systems
- Competitive advantage and trustworthy systems
- Consent and disclosure related to trustworthy systems
- Cost and benefits related to trustworthy systems
- Culture and trustworthy systems
- E-commerce and trustworthy systems
- Economics of trustworthy systems
- Education and training related to trustworthy systems
- Human action related to trustworthy systems
- Human behavior related to trust and information systems
- Human dependency related to trustworthy systems
- Human psychology related to trustworthy systems
- International issues related to trustworthy systems
- Management of trustworthy systems
- Management policy related to trustworthy systems
- National issues related to trustworthy systems
- Organizational control and trustworthy systems
- Organizational culture and trustworthy systems
- Organizational design and trustworthy systems
- Organizational strategy and trustworthy systems
- Security and privacy related to trustworthy systems
- Trustworthy and dependable hardware systems
- Trustworthy applications
- Trustworthy automated systems
- Trustworthy communications systems
- Trustworthy data transmission systems
- Trustworthy database systems
- Trustworthy embedded systems
- Trustworthy game and entertainment systems
- Trustworthy healthcare information systems
- Trustworthy Internet access and use
- Trustworthy Internet access and use for children
- Trustworthy Internet access and use for education
- Trustworthy Internet access and use for entertainment
- Trustworthy network components
- Trustworthy networks
- Trustworthy operating systems
- Trustworthy personal area network systems
- Trustworthy real-time systems
- Trustworthy software development
- Trustworthy user interfaces
- Trustworthy wireless systems
- Trustworthy workflow systems
