

Telework and Telecommuting Technologies (IJTTT)

ISSN: 2160-9896; EISSN: 2160-990X

Established 2013; Published Quarterly

Editor(s)-in-Chief: Stéfane M. Kabene (Ecole des Hautes Etudes en Santé Publique, France)

An interdisciplinary journal that serves as an arena where scholars, professionals, organizations can exchange ideas about the nature, goals, strengths, and weaknesses of telework. The journal encourages research that improves existing teleworking and telecommuting strategies to allow professionals worldwide to work and grow while also being protected. The place of human factors in telework is central to the journal and the future of work and management technologies is also discussed in this endeavor.

Topics Covered:

- Cross countries and cross cultural comparisons
- Distance learning
- Distance work
- E-training
- Future of telework
- Future of work and management technologies
- Globalization and telework
- Health impacts of telecommuting
- Human computer interface and telework
- Human resources management (recruitment, selection, training, management) and telework
- Innovation and telework
- Legal issues in telework
- Management models
- New technologies and methods
- Organizational management, technologies and telework
- Robotics, intelligent technology, and telework
- Societal impact of telework
- Teleworking an telecommuting models
- Teleworking models as a strategy to reduce impact of global catastrophic events
- Virtual teams
