Topic Collections

Data Science

A Book Bundle of 17 Scholarly Titles

Data serves as a building block of knowledge, presenting information useful in analyzing, valuing, and understanding an array of topics. Having the tools necessary to collect, assess, and apply data to real-world settings is essential in any research field.

The **Data Science** collection features 17 research-based works on various topics relating to big data, data mining, data analytics, data warehousing, statistics, and pattern analysis. This comprehensive collection showcases IGI Global's commitment to producing high-quality academic reference works for academicians, researchers, upper-level students, and data scientists interested in learning more about data extraction, analysis, and management.

Three Convenient Purchasing Options:

Print: $1,950
~~Regular List Price: $3,195~~
978-1-4666-6337-4

E-Book:* $2,900
~~Regular List Price: $4,795~~
978-1-4666-6338-1

Print/E-Book:* $3,850
~~Regular List Price: $6,385~~
978-1-4666-6336-7

*E-book access is available on a perpetual basis and includes all features of IGI Global's advanced platform. To learn more about IGI Global's platform, visit www.igi-global.com/eresources.

Innovative Techniques and Applications of Entity Resolution

Hongzhi Wang (Harbin Institute of Technology, China)
ISBN: 978-1-4666-5198-2; © 2014; 398 pp.

Draws upon interdisciplinary research on tools, techniques, and applications of entity resolution.

Innovative Approaches of Data Visualization and Visual Analytics

Mao Lin Huang (University of Technology, Sydney, Australia), et al.
ISBN: 978-1-4666-4309-3; © 2014; 464 pp.

Evaluates the latest trends and developments in force-based data visualization techniques, addressing issues in the design, development, evaluation, and application of algorithms and network topologies.

Data Mining in Dynamic Social Networks and Fuzzy Systems

Vishal Bhatnagar (Ambedkar Institute of Advanced Communication Technologies and Research, India)
ISBN: 978-1-4666-4213-3; © 2013; 412 pp.

Brings together research on the latest trends and patterns of data mining tools and techniques in dynamic social networks and fuzzy systems.

Ethical Data Mining Applications for Socio-Economic Development

Hakikur Rahman (University of Minho, Portugal), et al.
ISBN: 978-1-4666-4078-8; © 2013; 359 pp.

Provides an overview of data mining techniques under an ethical lens, investigating developments in research and best practices.

Innovations in XML Applications and Metadata Management: Advancing Technologies

José Carlos Ramalho (Universidade do Minho, Portugal), et al.
ISBN: 978-1-4666-2669-0; © 2013; 258 pp.

Addresses the functionality between XML and its related technologies towards application development based on previous concepts.

Pattern Discovery Using Sequence Data Mining: Applications and Studies

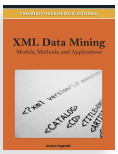
Pradeep Kumar (Indian Institute of Management, India), et al.
ISBN: 978-1-61350-056-9; © 2012; 286 pp.

Provides a comprehensive view of sequence mining techniques and presents current research and case studies in pattern discovery in sequential data by researchers and practitioners.

Graph Data Management: Techniques and Applications

Sherif Sakr (University of New South Wales, Australia), et al.
ISBN: 978-1-61350-053-8; © 2012; 502 pp.

A central reference source for different data management techniques for graph data structures and their application.



XML Data Mining: Models, Methods, and Applications

Andrea Tagarelli (University of Calabria, Italy)
ISBN: 978-1-61350-356-0; © 2012; 538 pp.

Aims to collect knowledge from experts of database, information retrieval, machine learning, and knowledge management communities in developing models, methods, and systems for XML data mining.

Advanced Database Query Systems: Techniques, Applications and Technologies

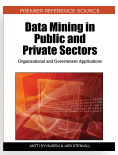
Li Yan (Northeastern University, China), et al.
ISBN: 978-1-60960-475-2; © 2011; 410 pp.

Focuses on technologies and methodologies of database queries, XML and metadata queries, and applications of database query systems.

Soft Computing Applications for Database Technologies: Techniques and Issues

K. Anbumani (Karunya University, India), et al.
ISBN: 978-1-60566-814-7; © 2010; 348 pp.

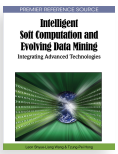
Treats the new, emerging discipline of soft computing, which exploits this data through tolerance for imprecision and uncertainty to achieve solutions for complex problems.



Data Mining in Public and Private Sectors: Organizational and Government Applications

Antti Syvajarvi (University of Lapland, Finland), et al.
ISBN: 978-1-60566-906-9; © 2010; 448 pp.

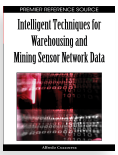
Explores the manifestation of data mining and how it can be enhanced at various levels of management.



Intelligent Soft Computation and Evolving Data Mining: Integrating Advanced Technologies

Leon Shyue-Liang Wang (National University of Kaohsiung, Taiwan), et al.
ISBN: 978-1-61520-757-2; © 2010; 516 pp.

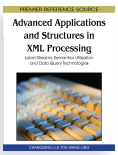
Integrates contrasting techniques of conventional hard computing and soft computing.



Intelligent Techniques for Warehousing and Mining Sensor Network Data

Alfredo Cuzzocrea (University of Calabria, Italy)
ISBN: 978-1-60566-328-9; © 2010; 424 pp.

Presents fundamental and theoretical issues pertaining to data management.



Advanced Applications and Structures in XML Processing: Label Streams, Semantics Utilization and Data Query Technologies

Changqing Li (Duke University, USA), et al.
ISBN: 978-1-61520-727-5; © 2010; 500 pp.

Reflects the significant research results and latest findings of scholars' worldwide, working to explore and expand the role of XML.

Dynamic and Advanced Data Mining for Progressing Technological Development: Innovations and Systemic Approaches

A B M Shawkat Ali (Central Queensland University, Australia), et al.
ISBN: 978-1-60566-908-3; © 2010; 516 pp.

Discusses advances in modern data mining research in today's rapidly growing global and technological environment.

Evolving Application Domains of Data Warehousing and Mining: Trends and Solutions

Pedro Nuno San-Banto Furtado (University of Coimbra, Portugal)
ISBN: 978-1-60566-816-1; © 2010; 364 pp.

Provides insight into the latest findings concerning data warehousing, data mining, and their applications in everyday human activities.

Data Warehousing Design and Advanced Engineering Applications: Methods for Complex Construction

Ladjel Bellatreche (Poitiers University, France)
ISBN: 978-1-60566-756-0; © 2010; 336 pp.

Covers the complete process of analyzing data to extract, transform, load, and manage the essential components of a data warehousing system.
