

E-Adoption in Developing Countries

A Collection of 16 Scholarly Titles

While technology continues to improve our society, culture, and economy around the world, some developing countries have only begun to receive the benefits of its influence.

The **E-Adoption in Developing Countries** collection highlights innovations and approaches towards the implementation of technologies and web applications in developing countries. This compilation of 16 scholarly titles covers topics on sustainable development, global information technology, global business, electronic government, and much more. These titles represent IGI Global's modern research on the adoption of technologies in organizational practices around the world.
